

**CTH G from CTH E to East Spur Road
Project I.D. 9029-01-00**

Addendum A June 25, 2013

- Q1. What year do you plan for this project to be constructed?
- A1. We are anticipating construction in 2016.
- Q2. We noticed you asked for our experience with public hearings. Usually for a project of this scope, we would perform just a public informational meeting, instead of a public hearing.
- A2. Public information meeting is perfectly fine.
- Q3. Would the west project limits include improvements to the horizontal curve along CTH G near East Spur Road? We assumed the east project limits along CTH G would begin just west of CTH E.
- A3. West project limits are at East Spur Rd before entering the curve, the remainder of the curve will be addressed in a separate project. The east limits are at CTH "E" including the intersection.
- Q4. Looking at the Marinette County GIS, this segment of roadway has primarily 66' of road right of way, except near Ferndale Road (120') and E. Spur Road (approximately 130'). Therefore, we would anticipate a right of way plat for the project. Would the County acquire the right of way on your own, or should we include real estate staff on our team for the acquisition of right of way?
- A4. The project will require a right of way plat and the county will contract with a right of way firm whether it be with the design firm or another separate firm.
- Q5. What is the proposed design schedule for the project?
- A5. Design in 2013/2014, Right of way 2015, Construction 2016.
