

Addendum #1 - RFP#17-031-52
Sheriff's Office Video Recording Replacement
Posted: May 4, 2017

Who provides the cabling to the interview rooms to provide power for the cameras and microphones?

If it is power cabling (electrical) I would think it would be more advantageous for us to get the exact specification from the selected vendor and have a local do any necessary wiring.

Who is responsible for running the cable from where the equipment will sit to the cameras and microphones in each room?

It there will be additional network cabling we would hire it out and it would be completed based on the vendors stated requirements

Does Marinette County have a recommended Network Cabling Company?

Wire-Tech out of Appleton, Wisconsin is who we usually use for any cabling/wiring/fiber needs. Good job and good price as well.
