

NOTICE OF TIMBER SALE

Sealed bids will be received by the County Forest Administrator, on behalf of the Marinette County Infrastructure Committee, for the sale of timber stumpage on the following numbered areas of county forest and county land in accordance with conditions set by the Committee. **All contracts will expire on September 30, 2022, except where noted.** Except for lump sum jobs, contract extensions may be granted upon written request, unless otherwise noted prices increase in accordance with committee policy.

NOTE: THE MARINETTE COUNTY INFRASTRUCTURE COMMITTEE MAY ADVERTISE THE MINIMUM STUMPAGE PRICES ACCEPTED.

TRUCKING WILL BE ALLOWED THROUGHOUT THE YEAR EXCEPT FOR PERIODS OF SEASONAL WEIGHT RESTRICTIONS. CONTACT THE MARINETTE COUNTY HIGHWAY DEPARTMENT FOR SPECIFIC INFORMATION BEFORE YOU PLAN ON TRUCKING.

NOTE: IT IS ILLEGAL TO HAUL MORE THAN THE LEGAL WEIGHT LIMIT FROM ANY PUBLIC OR PRIVATE LANDS ONTO PUBLIC ROADS. THERE IS AN INCREASING AWARENESS OF ROAD DAMAGE TO TOWN AND COUNTY ROADS ACROSS WISCONSIN. LOGGING TRUCKS ARE BEING BLAMED FOR MUCH OF THIS DAMAGE.

NOTE: IT IS ILLEGAL TO MARK TREES ON A TIMBER SALE. NOT ONLY DOES THIS PRACTICE VIOLATE THE FORESTRY ORDINANCE BUT IT ALSO CAN CREATE CONFUSION AT THE TIME OF HARVEST.

LOGGER TRAINING

The recent forest certification effort on our public lands has heightened the requirement to *“requiring appropriate training”* of its logging contractors. This is needed to maintain certification under the Sustainable Forestry Initiative® **SFI-01617 SFI 100%** certification standard. The requirement will apply to all Marinette County timber sales on county land sold after January 1, 2006. Marinette County Forestry will adopt training specifications of the Wisconsin SFI® Training Standard. This will align the County with requirements already in place for most of Wisconsin’s forest industry. The Forest Industry Safety and Training Alliance (FISTA) will continue to maintain loggers training records and provide much of the training. **Current SFI Training Certificates must be on file with the Forestry Office at all times.**

SNOWPLOWING

All forest roads used or constructed by a logging contractor shall be maintained, including snowplowing, and restored by the logging contractor prior to termination of the contract in a manner satisfactory to the Administrator.

SNOWMOBILE & ATV TRAILS

If a recreational trail passes through a sale area you must:

Maintain the area in a safe manner for recreational vehicles. Do not block the trail at any time. Keep the trail clear of slash and debris on daily basis. Park equipment and vehicles at safe distances from the trail. Decking on recreation trails is allowed only as a last resort and then as far off the trail as possible. (Snowmobile trail) Do not plow snow down to bare ground, try to maintain a packed snow base as much as possible.

CUTTING SPECIFICATIONS - ALL SALES

1. No tops are to be left hung-up.
2. All coniferous slash is to be lopped to within 30 inches of the ground, unless otherwise specified.
3. There shall be no skidding or decking of products on or across any town or county road, including ditches, or across any free flowing stream.
4. All state slash laws must be observed, particularly along any streams, state or county highways, town or county forest roads, powerline rights-of-way, designated snowmobile trails, and private property.
5. Where necessary, care and caution must be exercised to prevent damage to any residual species.
6. Trees designated not to be cut may not be removed for any reason without permission from Marinette County.
7. Trees that become hung-up in trees designated not to be cut must be removed with logging equipment.
8. Please note special cutting time periods.
9. Other specifications shall apply to specific sales as noted.

ANNOSUM ROOT ROT (HRD)

Annosum Root Rot is a serious disease that is causing conifer mortality in at least 20 counties in Wisconsin, mainly by infecting freshly cut stump surfaces in pine, spruce and fir stands. Marinette County is committed to preventing its establishment and all new contracts will require contractors to chemically treat fresh-cut conifer stumps with SPORAX or CELLU-TREAT as directed in each individual sale prospectus. Marinette County will furnish the necessary chemical, dye, and hand-application equipment. Treatment shall be performed by a certified pesticide applicator, must be completed within 24 hours of cutting, and is required from April 1st to December 1st.

MILL SCALE SALES

Mill scale tickets will be accepted on Tract #21-20 only.

LUMP SUM SALES

Lump sum bids will be accepted on Tract #37-19, Tract #22-20 and Tract #32-20 only.

CHIPS

Chipping of residual materials will only be available as an option on any job that has chips listed as available in the individual sale prospectus. Chip bids will not be included as part of the total bid value, unless the sale is listed with estimated whole tree volumes. Bidders interested in adding chips to eligible sales should contact the forester or the Forestry Office to attain estimated chip volumes or for more details.

ADDITIONAL INFORMATION

Sale will be based on price per cord, per thousand board feet, or per ton. Timber to be cut will be designated by minimum cutting diameter, or heights, or by marking. Interested persons should be sure to secure full information on cutting regulations and forms for bidding by writing to or calling the Marinette County Forestry Office, 1926 Hall Avenue, Marinette, Wisconsin 54143 (715-732-7525). **The Wausaukee Ranger Station has been closed to the public as a service center. To receive timber sale information and maps from foresters at Wausaukee you must call (715) 856-9156 for an appointment.**

Bids must be made on the form prescribed by the Committee and must be plainly marked on the outside "SEALED BID - TIMBER STUMPAGE." All bids should be enclosed in one envelope. Please note that bid forms are specific for each job. A person may bid on any or all of the designated sale areas. If a person bids on more jobs than s/he desires to be awarded, a written statement indicating the job or jobs preferred should be included with the bid. The Committee will withdraw bids of secondary choice if properly instructed.

Marinette County will not award a bid to a contractor who is not fully bonded on existing contracts and unless all scale dated more than thirty days prior to the bid opening has been turned in and paid in full.

A CERTIFIED CHECK, CASHIER'S CHECK, BANK OR POSTAL MONEY ORDER OR PERSONAL CHECK, MADE PAYABLE TO THE MARINETTE COUNTY TREASURER, IN THE AMOUNT OF AT LEAST 10% OF THE TOTAL BID MUST ACCOMPANY EACH BID. CASH WILL NOT BE ACCEPTED. LETTERS-OF-CREDIT IN THE AMOUNT OF 25% OF THE BID ARE ALSO ACCEPTABLE. THIS DEPOSIT WILL BE FORFEITED IF THE SUCCESSFUL BIDDER FAILS TO SIGN THE CONTRACT OFFERED WITHIN THIRTY DAYS. CHECKS AND MONEY ORDERS WILL BE RETURNED TO UNSUCCESSFUL BIDDERS AFTER THE SALE.

The successful bidder must be prepared to deposit an additional 15% of the bid within thirty days. The total bond deposit (25 percent) shall be held as evidence of the bidder's intention to faithfully carry out the provisions of the contract. This sum shall be refunded upon satisfactory completion of the contract. A performance bond or an irrevocable letter of credit, from an authorized bank, may be accepted in lieu of a cash deposit. Details on requirements may be obtained from the County Forestry Office.

The successful bidder must furnish a certificate of proof that s/he has Worker's Compensation Insurance at the time s/he is awarded a contract. This insurance must cover the contract period (including extensions) and all employees on the sale area. **All contractors are required to have Worker's Compensation Insurance including contractors with no employees.**

Contractors who bid as partners must provide a copy of their partnership papers at the time they are awarded a contract.

Committee policy requires that all wood must be scaled by Marinette County before being removed from the sale area or be purchased as a lump sum sale. Unless the sale is approved for use of mill scale tickets. Special exceptions must be approved by the Forest Administrator. Violation could result in citation to contractor.

New contractors who are successful bidders on more than one job are subject to the Committee's policy of only working on one job at a time, and are subject to paying scale in advance of hauling until satisfactory performance is established.

Bids will be received until 4:00 p.m., on Tuesday, October 27, 2020 in the Forestry Office, 1926 Hall Avenue, Marinette, Wisconsin. No bids will be accepted after the above stated hour. Bids will be publicly opened at 9:00 a.m., on **Wednesday, October 28, 2020.** Action on bids received will be taken by the Committee at their meeting on the morning of **Wednesday, November 4, 2020.** Successful bidders are requested to call for an appointment to sign contracts *the following week.* There will be no public auction of unsold jobs.

The Marinette County Infrastructure Committee reserves the right to reject any or all bids and to accept the bids which they deem most reliable.

2 year contract, scale on premises

Cutting Requirements:

Oak Wilt Restriction - No harvest operations are permitted within the Oak Thin harvest unit between April 1 and July 15. In all other units, care must be taken to avoid damage to residual oak during this timeframe. **Aspen Coppice:** Harvest all stems with one stick or more except for oak. **Northern Hardwood Thin:** Harvest all ash, ironwood, aspen, or any needle tree species with one stick or more. In addition, harvest all other stems marked with orange paint. **Oak Thin:** Harvest all aspen, maple, and needle tree species. In addition, harvest all stems marked with orange paint as well as any dead standing, merchantable oak.

Scale Notes:

Basswood cordwood and logs will be scaled as mixed hardwood (approximately 15 cds and 2.237 mbf). Spruce and white pine will be scaled as fir (approximately 10 cds of spruce and 30 cord of white pine).

In the harvest area cut all trees that contain one or more pulp sticks. There will be no cutting of any pine or oak. Large wolfy maples are encouraged to be left. Spruce includes balsam fir and tamarack. Any wet areas will be allowed to be cut around and left. Any areas where it is too rocky to run equipment will be allowed to be cut around and left. The forester in charge will be notified of these areas. There is an old road that splits this sale. However; this road is wet as it comes off Benson Lake Road and should only be used in frozen ground conditions. The no admittance area is an old homestead and no machines or work will be allowed to done in this area.

1 YEAR CONTRACT

Cutting Requirements:

Sale Area 2 must be cut last. It may only be harvested once all areas of Sale Area 1 are completed. Any bulldozer work must also be done last in Sale Area 2.

Trees that are marked with a Blue **12** are not to be utilized. They shall be cut to a minimum of 12' in length and then placed lying down next to the cut stump, with no slash or brush over them.

Remove the top so that the log can lie flush to the ground. Avoid damage when felling and skidding to all of larger Hawthorns. Leave all down and dead trees in each sale area, as these trees will also serve as drumming logs for grouse. Please remove any slash that maybe across these trees as well.

Cut all Aspen 2" and greater in size. Cut all Conifer species which contain 3 or more 100" pulp sticks. Cut all other trees containing 1 or more 100" pulp sticks.

Sale Notes: For management reasons this is a 1 year contract Job. Full performance bond will be revoked if the sale is not completed. No extensions will be grated for any reasoning. Any species not listed in volume chart will be scaled as Mixed Hardwood. Any Sugar Maple logs will be scaled as Mixed Hardwood Logs. All landings and turnarounds must be pre-approved by County Forester. All berms must be re-established by contractor following completion of the job.

Sec. 32 T36N R21E

2 year contract, scale on premises

Cutting Requirements:

Harvest all stems with one stick or more to a four inch top.

Dry or frozen ground conditions may be necessary to avoid rutting in several locations of the harvest units. The lowland crossing must be approved by the supervising forester and will most likely need to be brushed with tops/pulp from the adjacent harvest units or matted with timber mats to avoid soil compaction/rutting.

*Operability: Portions of the sale are made up of large rock formations. It is understood that portions of the harvest area may not be harvestable for this reason. These areas must be reported to the supervising forester for approved leave.

*Do not plow snowmobile trail to bare ground when trails are open.

Scale Notes:

Basswood pulp will be scaled as mixed hardwood, approximately 20 cd.

Any needle tree species not listed will be scaled as white pine.

Any balm or cotton wood will be scaled as aspen, approximately 5cd.

Gap Harvest – 83 Acres (actual cut acreage 29 acres).

- Cut all trees within each gap. Gap size is either 1/8 or 1/2 acre in size.
- All gaps are ringed with purple paint.
- Gaps have already been anchor chained. The gap area is a special study area in conjunction with USFS and WDNR.

Marked Hardwood – 66 Acres.

- Cut all trees marked with orange paint.
- Cut all aspen, balsam fir, white birch and ironwood greater than 2” diameter.

Aspen Clearcut – 2 Acres.

- Cut all trees containing 1 or more 100” sticks.

Entire Sale

- **Oak Wilt restriction** – Due to the large amount of oak in the northern hardwood stand, no harvesting forwarding or road building between April 1st and July 15th will be allowed.
- **Scaling notes** – all balsam and spruce will be scaled as balsam fir. Mixed hardwood logs are comprised of basswood, white ash, red maple and yellow birch. Approximately 70% of the mixed hardwood log volume is basswood.

2 YEAR CONTRACT

Cutting Requirements:

Cut all trees marked with Orange Paint at dbh and the stump. Basswood shall be cut down to an 8" diameter and all other trees to a 5" diameter. Tops shall NOT be run through the processor head and must be kept intact as much as possible. Tops must be grouped when possible—the intention is to create natural deer shelters for seedling and saplings—crisscrossing the grouped tops is preferred if possible. If tree tops cannot be grouped then they shall ALWAYS be placed over cut stumps. If tops cannot be handled as described by the processor, then the forwarder will be expected to handle the tops.

Sale Notes:

This job will require slower operations and much care while harvesting—Bid accordingly. The main skid trails must be used. All secondary skid trails will run to the main trail except in the far northern part of the sale. Here a new main skid trail may be created.

There is a Snowmobile trail adjacent to a portion of this sale. The trail also shares a small section of the trucking road, snow plowing will not be done to bare ground. Mixed Hardwood Log volume contains 18 MBF of White Ash.

Cutting Requirements

In the red pine plantation, cut all trees marked with orange paint.

In the coppice area, cut all trees 2" diameter and larger except white oak, white spruce, white pine, and red pine larger than 18" DBH. Ignore all purple paint. No harvest activities in the coppice area from April 1st to July 15th to prevent the spread of oak wilt.

Across the entire job if harvest occurs from April 1st to December 1st, cut pine stumps must be treated for HRD. Less than 5 cords of fir will be scaled as oak.

SILVER CLIFF

CUTTING SPECIFICATIONS

Cut all trees 2" and larger, EXCEPT aspen and purple marked trees. This contract will be for two years, however all cutting and skidding must be completed during the period of December 1st to March 1st. No pole skidding is allowed. All oak 10" and larger on the small end will be scaled as a log. A small amount of white oak will be scaled as red oak. Do not plow the snowmobile trail to bare ground. The harvest area will be scarified by Marinette County prior to logging to knock down the brush and rip up the soil.

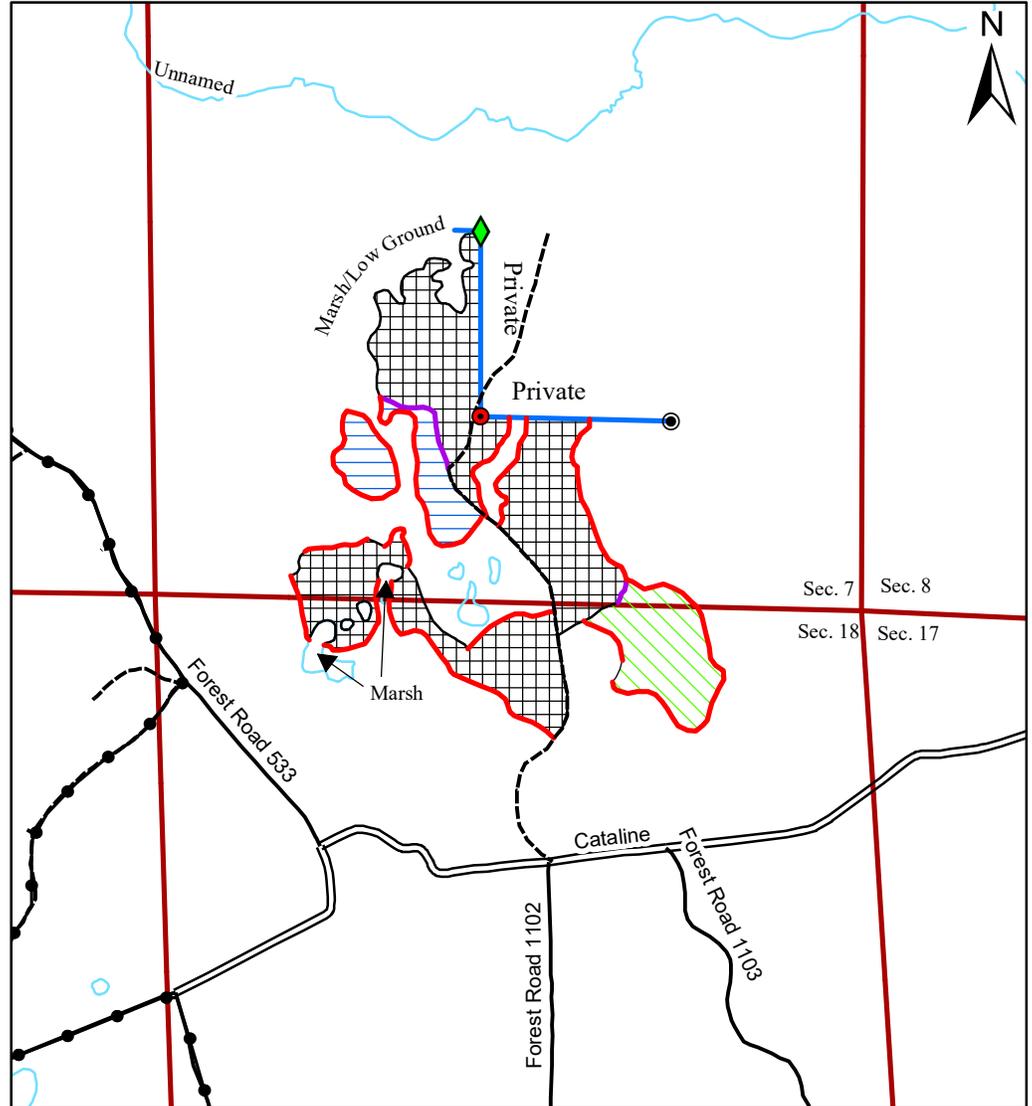

This job does not have a lot of volume per acre, but it is an easy logging opportunity.

Cutting Requirements:

Sale Area 2 must be cut last. It may only be harvested once all areas of Sale Area 1 are completed. Any bulldozer work must also be done last in Sale Area 2.

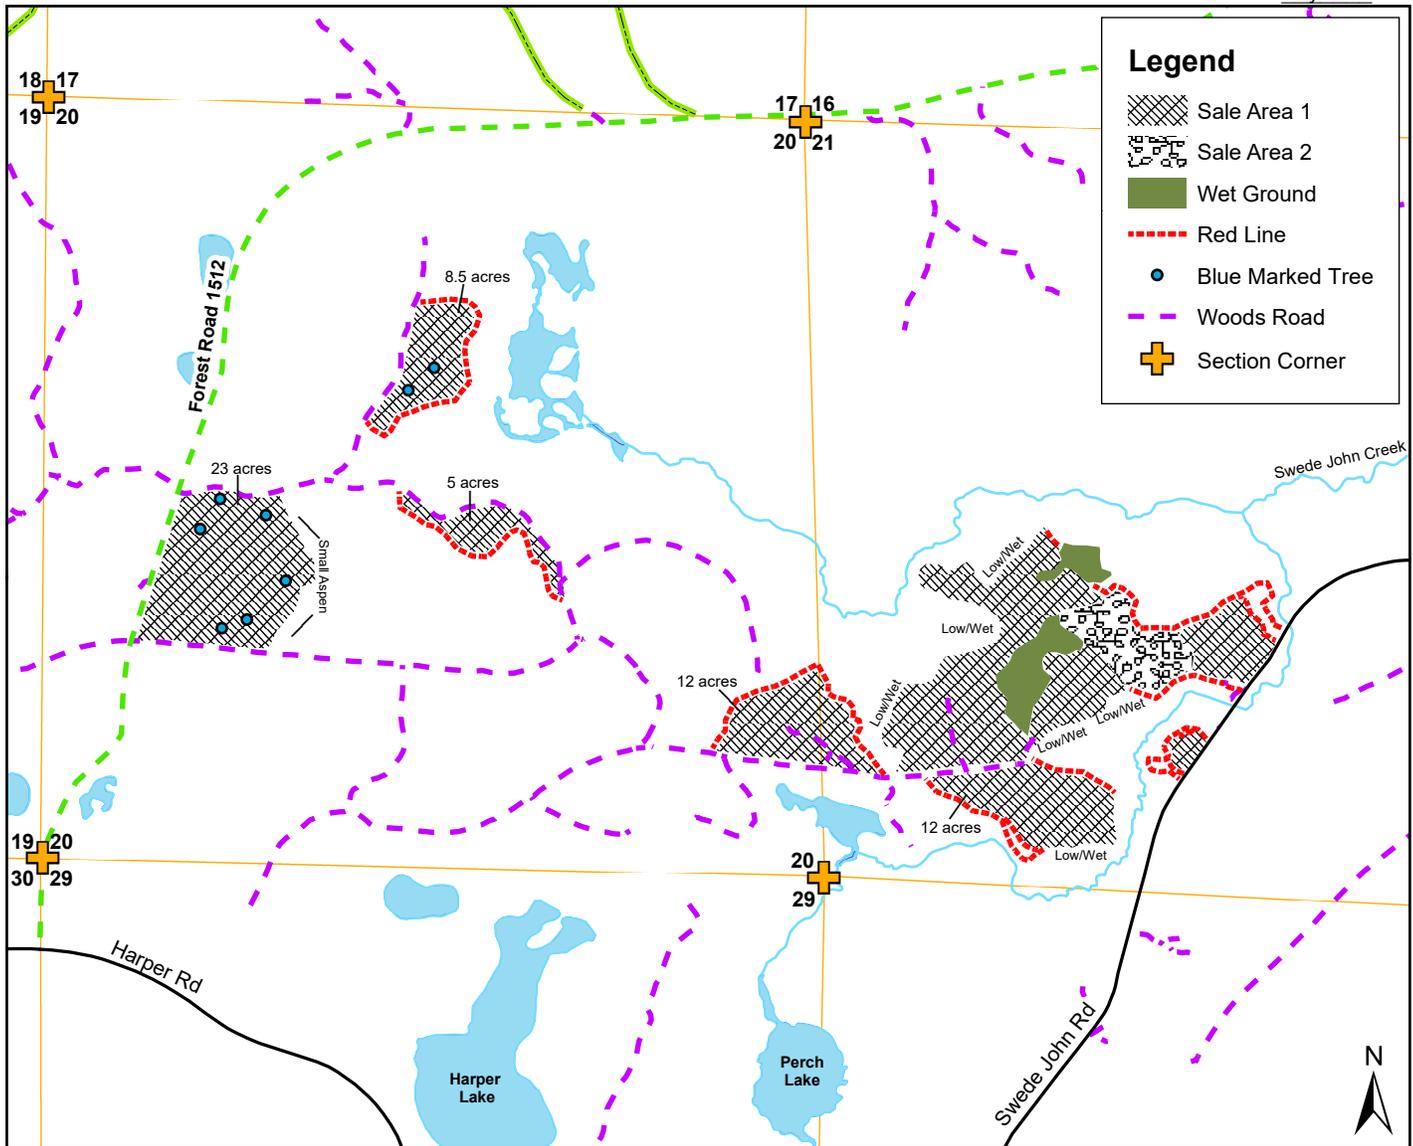

Trees that are marked with a Blue 12 are not to be utilized. They shall be cut to a minimum of 12' in length and then placed lying down next to the cut stump, with no slash or brush over them. Remove the top so that the log can lie flush to the ground. Avoid damage when felling and skidding to all of larger Hawthorns. Leave all down and dead trees in each sale area, as these trees will also serve as drumming logs for grouse. Please remove any slash that maybe across these trees as well.

Cut all Aspen 2" and greater in size. Cut all Conifer species which contain 3 or more 100" pulp sticks. Cut all other trees containing 1 or more 100" pulp sticks.

Sale Notes: For management reasons this is a 1 year contract Job. Full performance bond will be revoked if the sale is not completed. No extensions will be grated for any reasoning. Any species not listed in volume chart will be scaled as Mixed Hardwood. Any Sugar Maple logs will be scaled as Mixed Hardwood Logs. All landings and turnarounds must be pre-approved by County Forester. All berms must be re-established by contractor following completion of the job.

Comp. 366

1:15,840 4" = 1 mile

Ryan Bourassa (715) 923-8891

Cutting Requirements:

Harvest all stems with one stick or more to a four inch top.

Dry or frozen ground conditions may be necessary to avoid rutting in several locations of the harvest units. The lowland crossing must be approved by the supervising forester and will most likely need to be brushed with tops/pulp from the adjacent harvest units or matted with timber mats to avoid soil compaction/rutting.

***Operability:** Portions of the sale are made up of large rock formations. It is understood that portions of the harvest area may not be harvestable for this reason. These areas must be reported to the supervising forester for approved leave.

***Do not plow snowmobile trail to bare ground when trails are open.**

Scale Notes:

Basswood pulp will be scaled as mixed hardwood, approximately 20 cd.

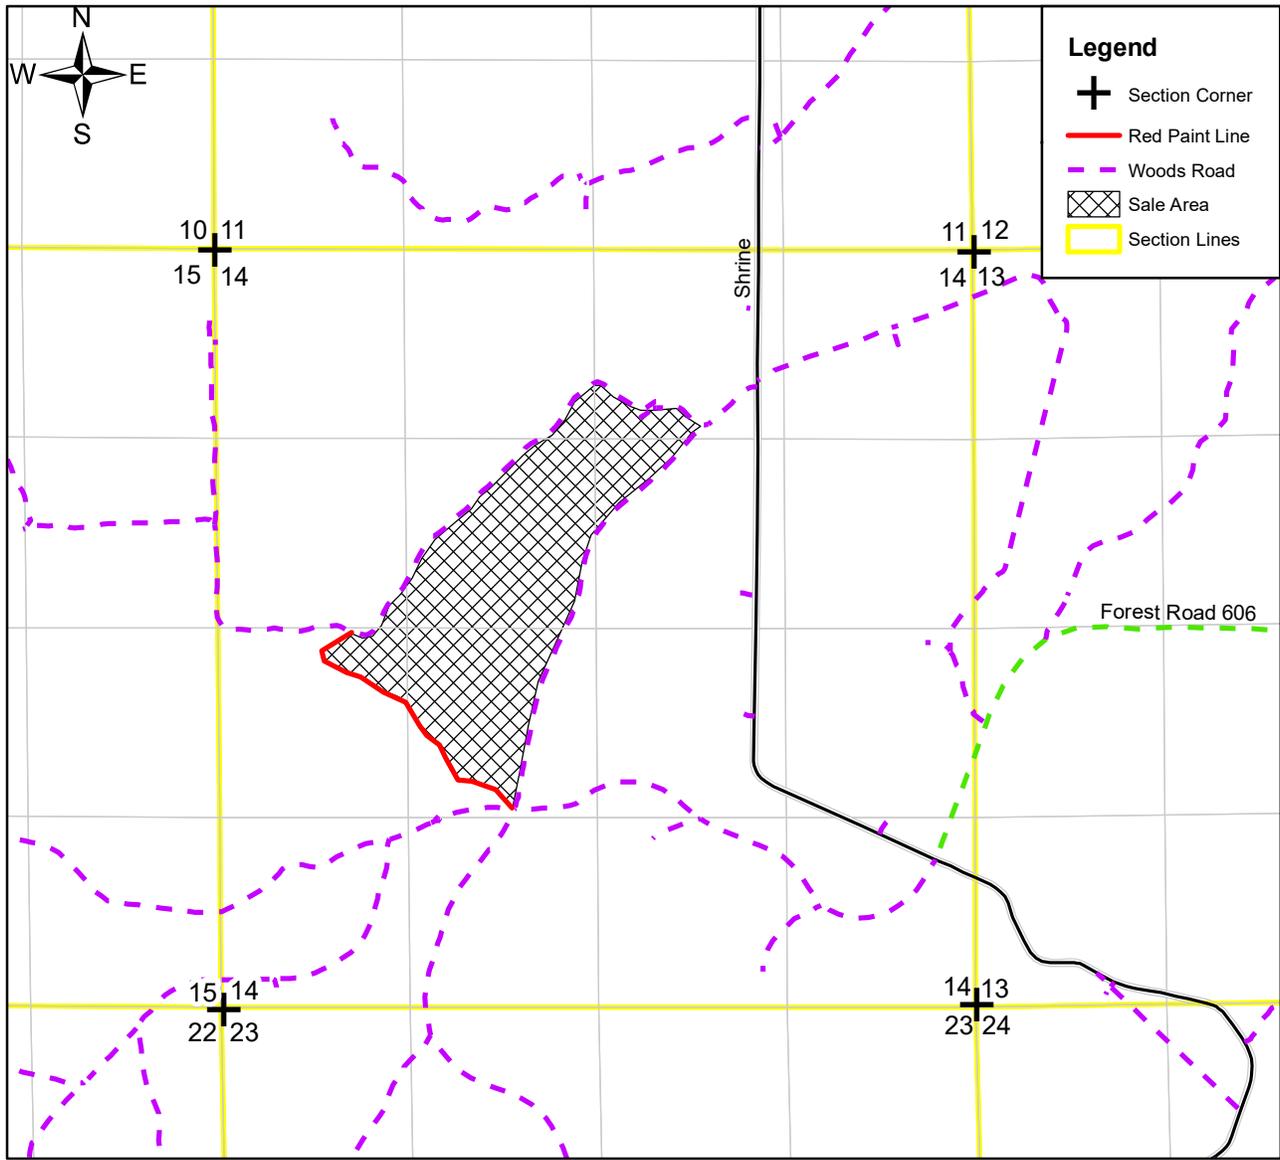

Any needle tree species not listed will be scaled as white pine.

Any balm or cotton wood will be scaled as aspen, approximately 5cd.

 Acres to Cut 151

Oak Wilt Restriction Only

Mapped by: Marcus Isaacson

Gap Harvest – 83 Acres (actual cut acreage 29 acres).

- Cut all trees within each gap. Gap size is either 1/8 or 1/2 acre in size.
- All gaps are ringed with purple paint.
- Gaps have already been anchor chained. The gap area is a special study area in conjunction with USFS and WDNR.

Marked Hardwood – 66 Acres.

- Cut all trees marked with orange paint.
- Cut all aspen, balsam fir, white birch and ironwood greater than 2" diameter.

Aspen Clearcut – 2 Acres.

- Cut all trees containing 1 or more 100" sticks.

Entire Sale

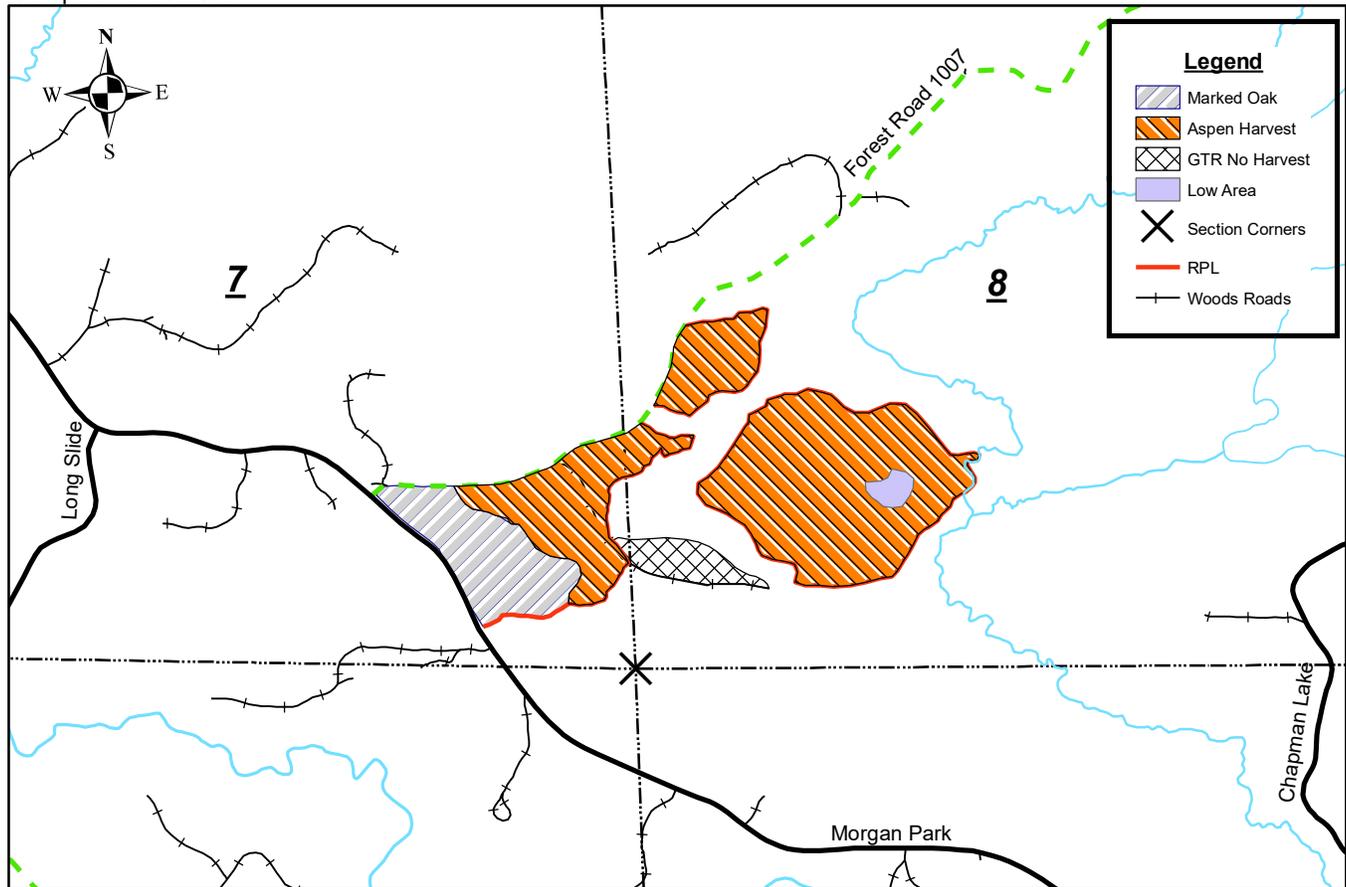

- **Oak Wilt restriction** – Due to the large amount of oak in the northern hardwood stand, no harvesting forwarding or road building between April 1st and July 15th will be allowed.
- **Scaling notes** – all balsam and spruce will be scaled as balsam fir. Mixed hardwood logs are comprised of basswood, white ash, red maple and yellow birch. Approximately 70% of the mixed hardwood log volume is basswood.

T35N-R17E Town of Silver Cliff

Tract # 38-20
Contract # _____
Sale Name: Browzin
Acres to Cut: 175
Scale Method: Stick Scale
Contract Period: 2 Years

Cutting Requirements:

Cut all trees marked with Orange Paint at dbh and the stump. Basswood shall be cut down to an 8" diameter and all other trees to a 5" diameter. Tops shall NOT be run through the processor head and must be kept intact as much as possible. Tops must be grouped when possible—the intention is to create natural deer shelters for seedling and saplings—crisscrossing the grouped tops is preferred if possible. If tree tops cannot be grouped then they shall ALWAYS be placed over cut stumps. If tops cannot be handled as described by the processor, then the forwarder will be expected to handle the tops.

Sale Notes:

This job will require slower operations and much care while harvesting—Bid accordingly. The main skid trails must be used. All secondary skid trails will run to the main trail except in the far northern part of the sale. Here a new main skid trail may be created. There is a Snowmobile trail adjacent to a portion of this sale. The trail also shares a small section of the trucking road, snow plowing will not be done to bare ground. Mixed Hardwood Log volume contains 18 MBF of White Ash.
